Portfolio

SUMMARY

Aspiring Full Stack Developer with solid hands-on experience in web development and a growing skill set in DevOps practices. I've built and deployed multiple full-stack applications using technologies like React, Next.js, Express.js, and MongoDB. I'm constantly expanding my knowledge in containerization, automation, and CI/CD pipelines. I thrive in fast-paced environments and love solving real-world problems with code.

EDUCATION

Btech in Computer Science and Engineering

University Institute of Engineering and Technology, CSJM University, Kanpur

August 2022 -

Kanpur, Uttar Pradesh

PROJECTS

CreResume - Resume Builder

<https://creresume.pandeg.xyz>

- Tech Stack: Next.js, MongoDB, Tailwind CSS, NextAuth

- Developed a modern, ATS-friendly resume builder that enables users to create, customize, and download professional resumes as PDFs. Integrated email/password authentication using NextAuth for secure access. Features include real-time resume preview, structured data input, and responsive design for seamless use across devices. Resumes are optimized for Applicant Tracking Systems to increase job application success. Backend powered by MongoDB for efficient data handling.

e-dukan - An ecommerce website

<https://edukan.pandeg.xyz>

- Tech Stack: React.js, Tailwind CSS, Express.js, MongoDB, Razorpay

- Developed a full-stack e-commerce platform offering a complete shopping experience, from product discovery to secure payment. Implemented user authentication, cart management, order tracking, and dynamic product filtering by category and price. Designed a responsive, mobile-friendly UI using React and Tailwind CSS. Built a scalable backend with Express.js and MongoDB for managing users, products, and orders. Integrated the Razorpay payment gateway for real-time, secure transactions. Focused on clean architecture, usability, and end-to-end functionality.

GithubInfo – GitHub Profile Viewer

<https://githubinfo.pandeg.xyz>

- Tech Stack: Next.js, Tailwind CSS, GitHub API, Recharts

- Developed a GitHub profile viewer where users can enter any GitHub username to fetch and display detailed profile information. Leveraged the GitHub REST API to show user details like name, bio, public repositories, followers, and more. Integrated interactive charts using Recharts to visualize repository data and activity. Built with Next.js for fast, SEO-friendly rendering and Tailwind CSS for a responsive, modern UI. Focused on clean API handling, dynamic routing, and real-time data fetching.

SKILLS

Frontend : React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux

Backend : Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Prisma ORM, Mongoose

DevOps & Deployment : Docker, Kubernetes (basic), AWS (EC2, S3, deployment), GitHub Actions

Testing & Monitoring : Jest, Vitest, Postman, Unit Testing, API Testing, Cypress, New Relic, Prometheus, Grafana, Log Monitoring, Basic Observability

Real-Time & Caching : WebSockets, Redis

Tools & Platforms : Git, GitHub, Linux CLI, VS Code, Vercel, Netlify, Heroku

Programming Languages : Java (Data Structures & Algorithms), JavaScript, Python (basic)

Additional : Authentication (NextAuth, JWT), Razorpay Integration
